Take your designs to lofty heights: you can create plenty of storage space with wall cabinets right up to the ceiling. The integrated opening angle stop prevents a collision with the ceiling. Press the wireless switch once and the lift system closes softly and effortlessly thanks to SERVO-DRIVE. Then add an intelligent plinth solution and absolute convenience is guaranteed.

With living space decreasing, we need to make the best possible and most creative use of the available capacity. This home office uses a combination of a lift up and side-board integrated into the living area. A laptop and writing utensils can be easily hidden away after work, allowing the room to return to its regular cosy environment.

Scandinavian design is popular all over the world and for good reason. This kitchen combines our practical lift systems with complete ergonomic consideration to give a kitchen that will function all year round. Appliances are hidden behind a lift-up, that also incorporates a pull-out shelf for convenient access, and an integrated flat screen on the front of a unit makes it easy to follow a recipe without damaging the screen. Surely the most perfect, individual kitchen around!

The bedroom should be a place of retreat, cosy and comfortable with discreet lighting that is also enough to read a book by. This wall unit with integrated lighting provides the perfect solution. The various lift-ups allow for storage of books and other necessities, and also contain the lighting solution. Our practical plinth solution, means items stored in the upper units are still within easy reach.

It is possible for a kitchen unit with a low internal cabinet depth to offer more storage than is visible at first glance. Small cabinets sunk into the wall reveal their surprise internal storage when the stay lift is opened. Thanks to the thin fronts, the lift systems appear especially elegant and our mechanical opening support system ensures ease of use.

A uniform design gives a feeling of simplicity and is easy to accomplish, but being able to combine different types of units, finishes and colours will achieve a more designed feel. Different solutions are often required and can be very effective when used in conjunction with our different motion technologies. An excellent opportunity to indulge in your creativity.

A spacious island kitchen turns a functional room into a sociable space for entertaining. Thanks to the sophisticated light-filled cabinets, and the mirrored plinths, the island seems to float. The suspended wall cabinets above the island with their aluminium frames and frosted glass intensify the feeling of weightlessness. The AVENTOS lift ups support the design, giving easy access to cabinet interiors, which in combination with the plinth step, maximises storage space.

A living space less ordinary. This room is full of quirky storage solutions, creating a design-led feature. Instead of a boring living room wall, each element stands on its own and creates a focal point. The individual pieces of wall storage work well together with an asymmetrical bi-fold, up & over and stay lift design, while the plinth step below provide optimal access and additional storage space.

A modern kitchen island featuring a dark grey, textured cabinet base with six drawers. The island has a white countertop with a central cutout. Above the countertop, there is an open shelving system with a metal frame and a light strip. The shelves are filled with white dishes, a glass bottle, and a small plant. The island is set against a wall with a large window and a skylight. The floor is made of light-colored wood.

The serving hatch is currently experiencing a revival. It has always been practical, and now, thanks to a modern interpretation, this classic solution is finding a new popularity. With one touch, all storage items are accessible in the wall cabinet with its up & over lift system - the elegant 8 mm thick, continuous marble front adds to the sleekness of the unit.

Some practical items should probably be stored out of sight, behind a lift system. Decorative or valuable items on the other hand, look great on show, but may also need to be protected. A glass display cabinet with a narrow, dark, aluminium frame is both an optical and practical solution. As for the furry members of the family, you can also create an additional place of retreat via a suitable lift system solution.

Design features are becoming more and more adventurous! Surprise your customers with unique furniture ideas. This dining room table is a family gathering area, a room separator and, surprisingly, a home entertainment centre all at the same time. A TV screen is concealed in the lift up which integrates perfectly into the furniture thanks to a mitre. It is nearly invisible when not in use, but appears with a light touch of the electrical switch.

Square rooms are particularly good for use as a modern open plan kitchen with an integrated eating area so that no one is left out of any of the fun during food preparation. The suspended wall cabinet gives access on both sides, with contents easily accessible at all times. The electrical motion support system SERVO-DRIVE provides additional convenience.

For the bi-fold lift system:  
front folds up

Create connecting elements that allow spaces to merge together. The solid wooden fronts in the kitchen area sit alongside bi-fold lift systems with narrow aluminium frames and frosted glass, incorporating a suitable lighting scheme for the eating area. This is how you harmoniously merge the design so that it all fits within the respective living space.

For the bi-fold lift system:  
front folds up

A wall unit in the bedroom can provide huge amounts of additional storage in a design-led fashion. It doesn't have to be simply storage for clothing, shoes and accessories; finding space for a home theatre might be somewhat unexpected, but can make perfect sense! Thanks to a wide bi-fold lift system with an electrical opening support system, a light touch is all that's needed to get everything ready for a cosy night in.

For the stay lift:  
one-part front pivots up

This large window façade ensures a light-filled, airy kitchen. Cabinet doors would conceal the view and intrude into the space, lift systems are a much more practical solution, they simply move up out of the way. Lift systems can be used to conceal unsightly kitchen appliances such as a food processor or microwave. Thanks to SERVO-DRIVE, one touch and the appliances are ready for use and then disappear just as quickly when finished with.

Merging living spaces is a popular solution in today's busy homes. Wall units are a great way to bring the different elements of the space together. The kitchen area moves harmoniously into the dining area with suspended units marking the borders. Access to the units is easy with a suitable AVENTOS lift system.

The Blum logo, consisting of a stylized lowercase 'b' followed by the word 'blum' in a bold, sans-serif font, all contained within an orange rectangular background.

It's all about the proper staging: bulky, but at the same time delicate musical instruments are in good hands in a large bi-fold lift system, both well protected and easily accessible. The elegant design with narrow aluminium frames as well as suitable lighting underscores the importance of this cherished hobby.
