

AVENTOS top lift systems – Full freedom of movement

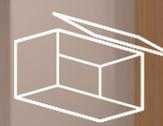

Whether the front on your wall cabinet folds up, swings up and over, lifts up or pivots up, never again will you hit your head. That is because lift systems move the fronts up and out of the way, even when they are left open while you do the cooking. What's more, the new AVENTOS top lift systems require less space when installed in the cabinet thanks to their elegant and compact design.

Front folds up

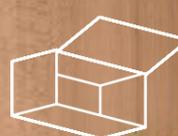

Front swings up and over

Front lifts up

Front pivots up
